

Keeping Pace with ePrescribing Regulatory Compliance

Trends Impacting Near-Term
Product Road Maps

February 20, 2019

GoToWebinar Logistics

The image shows a GoToWebinar interface. On the left is a vertical sidebar with four icons: a back arrow (circled in red), a phone handset, a document, and a hand pointing up. In the center, a red box titled "Join the audio conference" contains the text: "Dial in using your phone or select Computer audio to use your mic & speakers." A red arrow points from this box to the "Audio" window on the right. The "Audio" window has a menu bar with "File", "View", and "Help". Below the menu bar is a section titled "Audio" with two options: "Computer audio" (unselected) and "Phone call" (selected). Below these options are the following details: "Toll-free: 1 877 309 2074", "Long distance: +1 (213) 929-4221", "Access Code: 487-383-574 #", and "Audio PIN: 93 #". Below this is a link that says "Problem dialing in?". At the bottom of the "Audio" window is a section titled "Questions" (circled in red) with the text "Webinar Now" and "Webinar ID: 156-278-715". The GoToWebinar logo is at the bottom right of the window.

Agenda

- ✓ Understand How Prescribing is Regulated
 - ✓ Major Federal Legislation and Impacts
 - ✓ Key State Legislative Activities
 - ✓ Overview of Long-Term, Post-Acute Care Regulations
 - ✓ Key Trends Impacting EHR Design
 - ✓ Crystal Ball – What Might be Next?
- 

Poll Question

Does responsibility for ePrescribing regulatory compliance fall on an individual or a department?

- ☐ Individual
- ☐ Department

Presenters

Keith Fisher, R.Ph.

Co-Editor, Regulatory
Resource Center

EHRs and EDI
Point-of-Care Partners

Governance of Prescribing Processes

- **States** govern prescriptions with many agencies, statutes and rules
- DEA only governs controlled substance prescriptions

Noncompliant ePrescribing Risks

Dissatisfied customers
and reduced confidence in
your solution

Lost opportunity to use
development staff to create
new value for customers

Staff time expense – help desk
calls, routine software updates,
emergency “hot fixes”

*Stakes are getting higher as new
mandates have significant impact on EHRs and
prescribers due to penalties for noncompliance*

Estimated Cost of Missed Regulatory Changes

Based on costs incurred by representative mid-size EHR company

Help Desk Calls

\$18,000

- 1 call/month for each customer
- 1% (5) are related to missed regulatory issues
- Each regulatory call requires 3 hours of staff time for call time, triage and research

Hot Fixes

\$50,000

Each hot fix to address major missed regulatory changes takes *5 hours per customer* and involves:

- Product Management Team
- Development Team
- Q/A
- Distribution
- Installation

Intangible Costs

\$\$\$

Cannot be quantified

- **Customer Satisfaction:** Physicians are legally liable for their prescriptions. If their software is not current, vendors risk customer dissatisfaction and possible loss
- **Opportunity Cost for Hot Fixes:** EHR staff not involved in hot fixes can allocate their time to other essential, revenue-generating work

Up-to-Date Compliant ePrescribing Benefits

Proactive vs.
reactive

Improved brand
reputation

Higher degree of
customer confidence

Eliminate the last minute
scramble to meet unexpected
regulatory requirements

*Incorporate regulatory
changes as part of normal product
development*

Poll Question

In the last 2 years, has your company had to roll out a hot fix in order to comply with an enacted regulation or rule?

☐ Yes

☐ No

Traditional Regulatory Trends Affecting EHRs

There are 485+ federal and state requirements that impact EHR prescribing compliance

PRESCRIBING

100+

Who can
prescribe what?

FORMATTING

300+

Printing
Specifics

DELIVERY

85

How does it get
there?

Federal Legislation Highlights

ENACTED

H.R .6, SUPPORT for Patients and Communities Act

- Effective **1/1/2021**
- Mandates EPCS and ePA for Part D covered drugs

Indications-Based Formulary Design

Effective **CY2020**

CMS Action for Part D Sponsors

PROPOSED

Modernizing Part D and Medicare Advantage To Lower Drug Prices and Reduce Out-of-Pocket Expenses

- Effective **1/1/2020**
- Proposed rule to require use of the real-time benefit check for Part D Sponsors
- [POCP Comments](#)

PROPOSED

21st Century Cures Act: Interoperability, Information Blocking, ONC Health IT Certification (ONC Cures Act)

- Comments through early April
- Requires use of APIs, FHIR and Standards for health IT certification

CMS Interoperability and Patient Access Proposed Rule

- Comments through early April
- Requires payers to share claims data through APIs and support electronic exchange of data for transitions of care

State Action (As of December 2018)

ELECTRONIC PRESCRIBING of CONTROLLED SUBSTANCES (EPCS)

21 

states have current or pending
EPCS LEGISLATION

ELECTRONIC PRIOR AUTHORIZATION

30 

states have current or pending
ePA LEGISLATION

14
require support for
ePA transaction

11
specify NCPDP
standard

PRESCRIPTION DRUG MONITORING (PDMP)

41 

states require
prescribers
access their PDMP
before prescribing

CONTROLLED SUBSTANCES

Some states are
sponsoring or requiring
access via EHRs and
others are sponsoring
access via their HIE

44 states have controlled substance (CS)
SCHEDULE VARIANCES

States are ramping up on rules governing controlled substance prescribing including new limits on prescribing e.g. days supply maximums; limits by prescriber type

37 states have
CS LIMITATIONS

States are requiring additional data, such as diagnosis, on the prescription

OPIOID CRISIS

State Action: Technology Solution

Prescription Drug Monitoring Programs

- State-run databases of dispensing records for Controlled Substances
 - Pharmacies and **dispensing prescribers** submit records
- Historically, PDMP utilization has been **optional** for clinicians

Challenge for compliance is clinicians exiting EHR workflow to access web-based PDMP

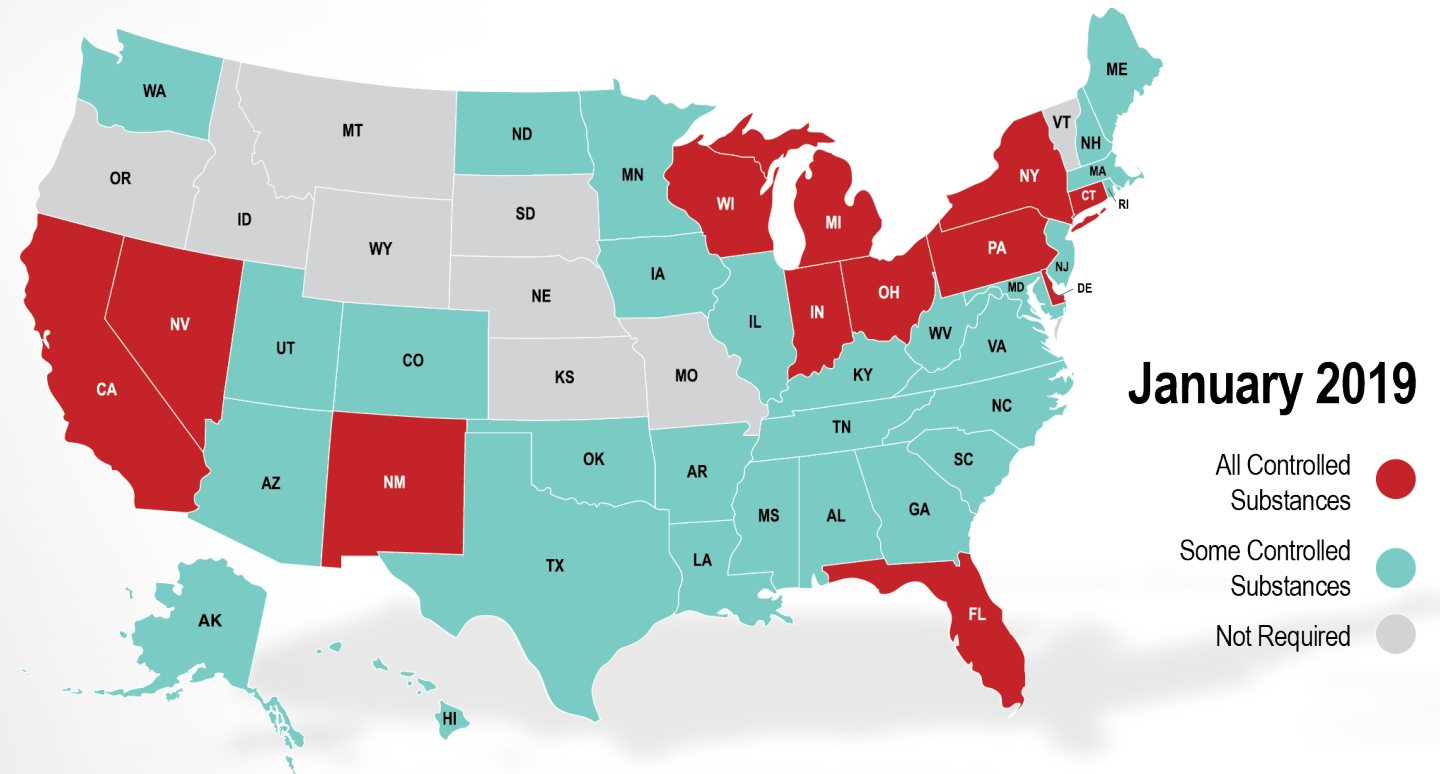

Regulatory Trend:

States Addressing PDMP EHR Workflow Integration

- Removing barriers to access
 - Allowing data sharing with EHRs
 - Encouraging integration into prescriber workflow
 - Interface from EHR to PDMP required by 1/1/2021 in one state
 - Another state requires EHR to be approved and to display PDMP data in prominent manner
 - In 3 states, prescribers must document viewing of PDMP in Medical Record

*As of January 2019, **25** states supported or required PDMP Integration through EHRs and/or HIEs*

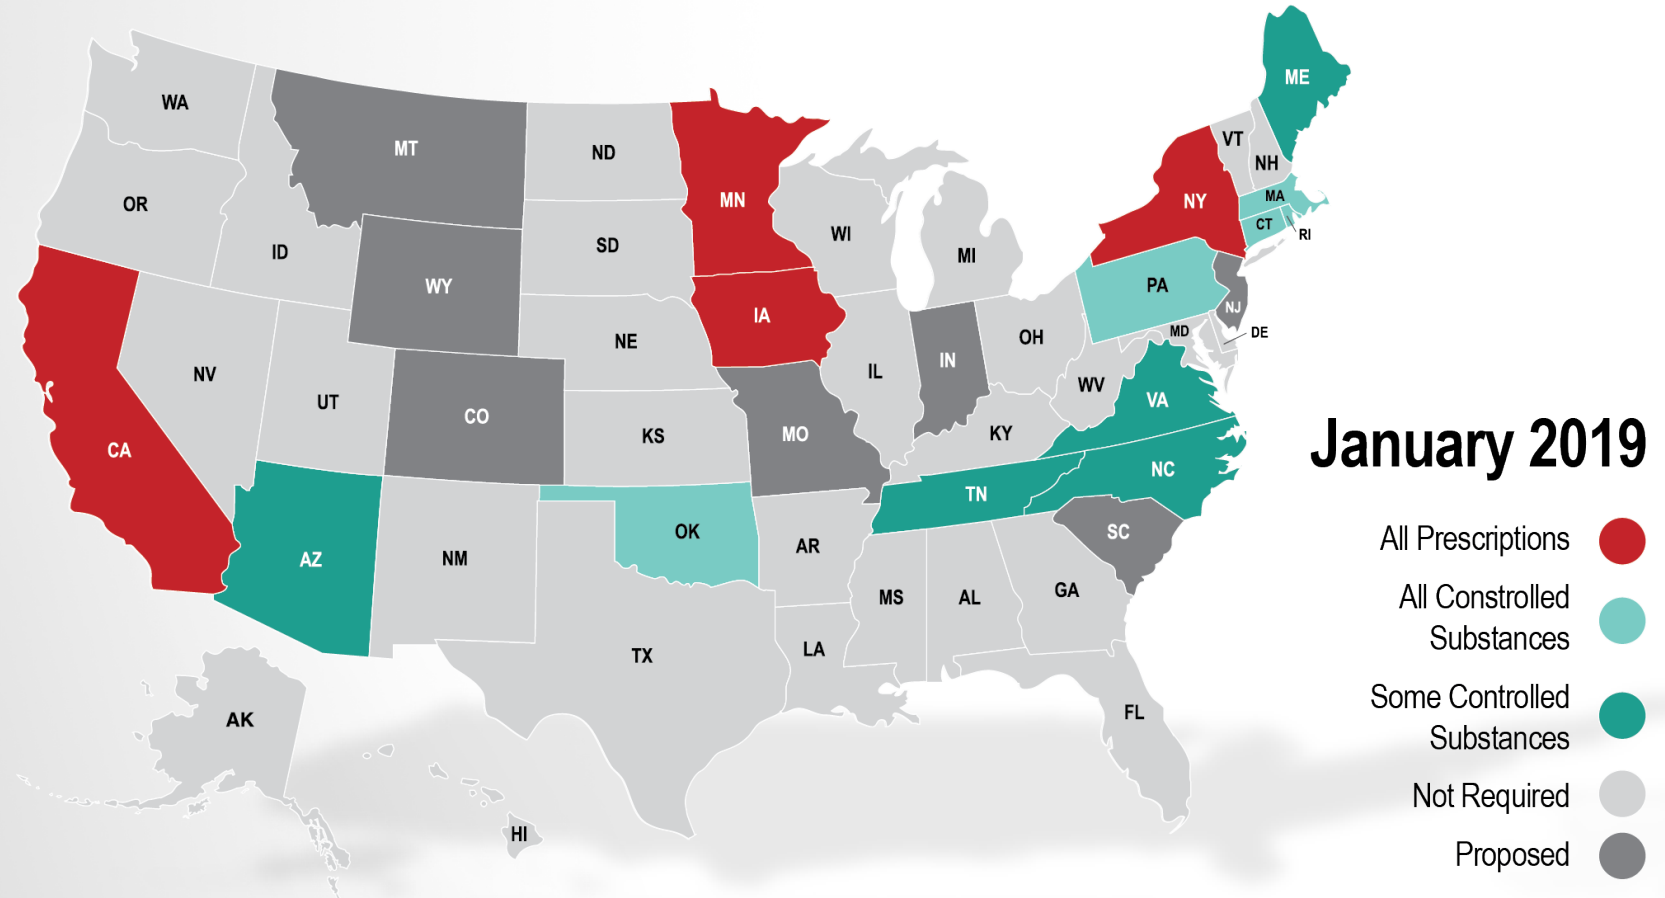

Prescriber PDMP Access Required

Where Electronic Prescribing is Required

States will continue to mandate the use of EPCS, which will gradually increase use by physicians.

© 2019 by Point-of-Care Partners, LLC. All rights reserved. Revised January 2019.

Upcoming State and Federal Deadlines: Mandatory ePrescribing

5/1/2019

1 State:
EHR vendor must comply

1/1/2020

6 States, including
1 for all CS &
Legend Drugs

1/1/2022

1 State: All CS &
Legend Drugs

10/24/2019

1 State

1/1/2021

H.R. 6 mandates
EPCS for Part D

*In addition, 5 states have mandatory
ePrescribing rules in effect.*

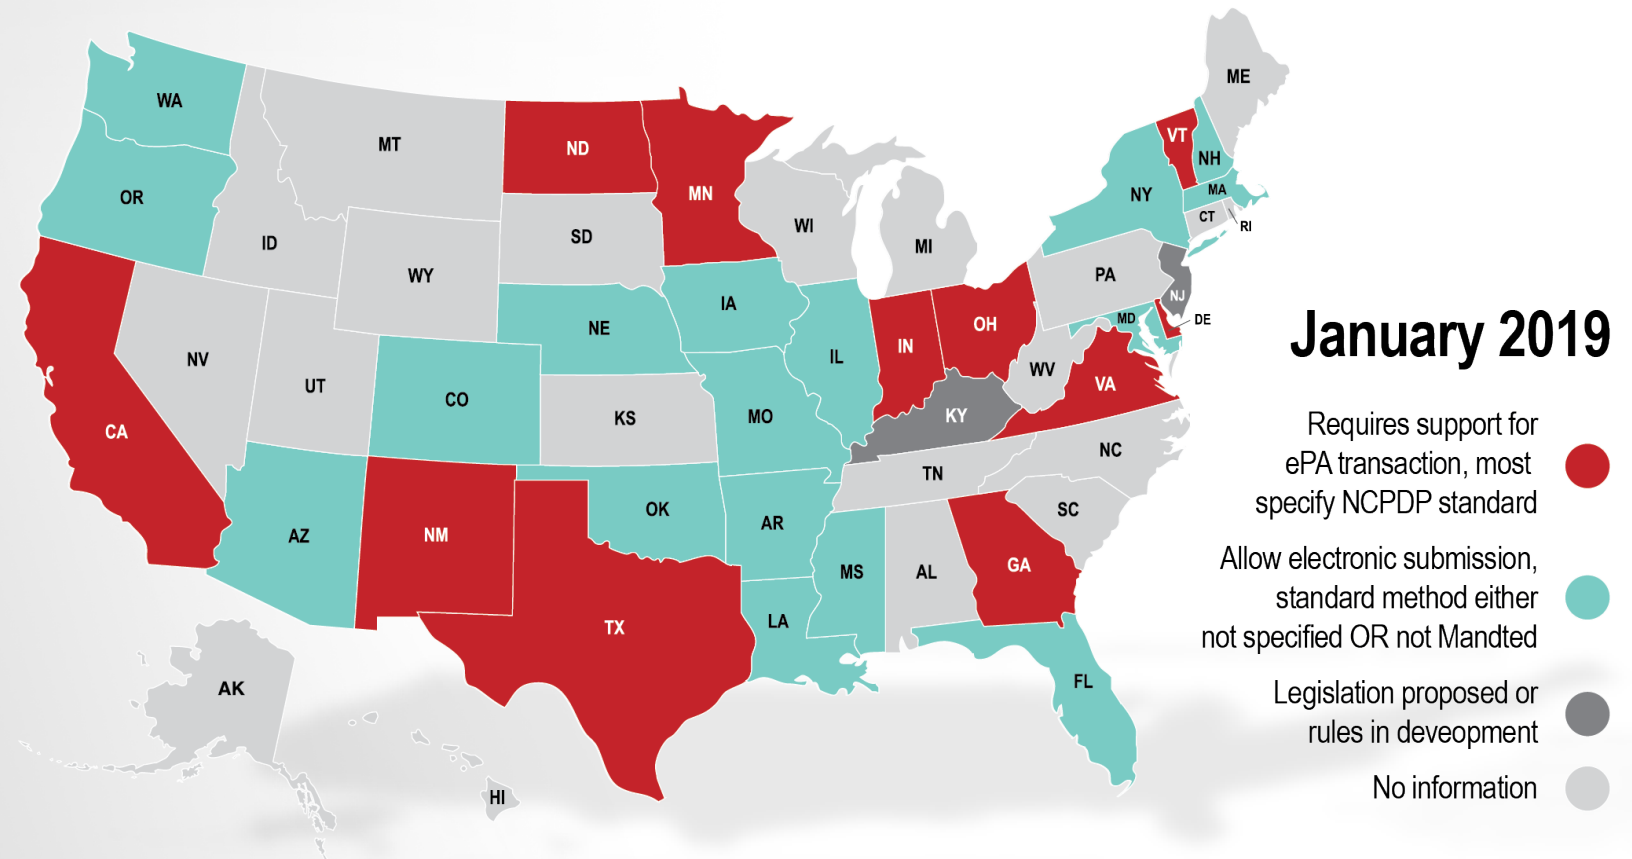

Regulatory Trend: Pharmacy Electronic Prior Authorization

Rx ePA specified in 11 states

- Require payers to support ePA
- 1 state requires providers to use ePA

Renewed focus on Medical PA - specialty medications

Pharmacy ePrior Authorization Laws

EHR Impacts:

Each Trend Has An Impact On EHR Design

- Mandated EPCS
- Mandated PDMP
- Mandated ePA

- SCRIPT 2017071 – January 1, 2020
- Real-Time Pharmacy Benefit Check
- RxChange
- RxFill

EHR Value

Poll Question

Does your organization have plans to offer software solutions in non-hospital care settings such as long-term, post-acute care environments?

☐ Yes

☐ No

Long-Term, Post-Acute Care

Highlights from POCP's LTPAC State Navigator issued in January 2019

- Exceptions and exemptions for long-term, post-acute care environments:
 - Prescription Drug Monitoring Programs
 - Some states do not require controlled substance prescriptions for residents of nursing homes to be reported to the PDMP
 - Electronic Prescribing of Controlled Substances
 - CS Limitations
 - Hospice patients and those with terminal illnesses have relaxed rules on prescribing and dispensing opioid quantities and partial fills
 - Prescribing Authority

POCP is monitoring and documenting wherever there are LTPAC deviations and developments at the NCPDP LTPAC Work Group.

What's Next?

Ongoing whirlwind of legislation, state and federal

- ePrescribing & ePA mandates
- Stronger PDMPs with mandated utilization
- Restrictions on opioid prescriptions
- Opioid and Benzodiazepines coadministration

Interoperability

- PDMP
- Price Transparency at point of care
- Real Time Benefit Inquiry
- 30 day medication reconciliation (Da Vinci Project)

Specialty Medication prescribing increases

ePrior Authorization gains traction

Trending

- Artificial Intelligence (AI)
- ePrescribing in Long Term Care & Post Acute Care
- Privacy & Security

Conclusions

- Prescribers are dependent upon their EHR vendors to proactively support regulatory requirements
- States will continue to regulate in different ways than Federal requirements
- EHR compliance in a rapidly changing regulatory environment is critical
- Anticipating regulatory impact enables concise product planning to enable cost effective EHR enhancements

Persistent Monitoring Ensures Compliance

ePrescribing solutions providers must diligently monitor legislative activities at state and federal levels to avoid non-compliance risks

Persistent Monitoring Ensures Compliance
