

Since 2016, states have dramatically increased regulations to expand the use of ePrescribing in order to address controlled substance abuse, better track biosimilars and address changes in prescribing dynamics. Keeping up with these new regulations requires persistent monitoring and analysis – particularly since some of these new rules place *specific requirements* on how medications are prescribed through electronic health records (EHRs).

Simplifies Regulatory Tracking

The ePrescribing State Law Review is a subscription service that combines access to Point-of-Care Partners regulatory experts with timely analyses of emerging laws and regulations governing electronic prescriptions. The ePrescribing State Law Review and our team of regulatory experts help companies with a stake in ePrescribing to stay abreast of the evolving eRx landscape.

Up-To-Date Regulatory Intelligence

Can Nurse Practitioners transmit controlled prescriptions in California? What states require board approval of ePrescribing systems? What type of prescription fax header is required in Washington DC? Are other states mandating electronic prescribing for all prescriptions like New York? What state is requiring non-Opiate Directive forms to be stored in the interoperable EHR?

Expert Edge

Point-of-Care Partners employs pharmacists and other experts who monitor and validate applicable state and federal regulatory and legislative activity daily to ensure that the ePrescribing State Law Review remains a best-in-class resource. Our team works with pharmacy board staff and members to elicit clarifications when rules or regulations don't specifically address innovative features and functionality of ePrescribing software or services.

Comprehensive Research

Point-of-Care Partners does the time-consuming research and delivers a timely analysis of state legislation and regulations to busy software product managers, customer service representatives, and others engaged in the facilitation of ePrescribing.

“Point-of-Care Partners listens to us and is always receptive to our calls”

Compliance Manager, HIT Vendor

“Without the ePrescribing State Law Review, we’d be flying blind. Whether we’re developing a new release or rolling one out, the reference has been invaluable.”

Product Manager

Leading Clinical Information Exchange Company

LTPAC State Navigator

The new LTPAC State Navigator builds on the ePrescribing State Law Review by adding an LTPAC overlay to highlight the impacts of regulatory nuances by state on LTPAC facilities and the companies that offer technology solutions used to support LTPAC workflows.

With the ePrescribing State Law Review, you receive:

- Quarterly data sets for all 50 states and DC that enable you to readily assess if your ePrescribing solution is compliant with current and newly enacted federal, local and state-by-state Board of Pharmacy (BOP) rules, regulations, and laws on ePrescribing and EPCS
- Written summary of changes included in each quarterly update along with a detailed backup with relevant regulations and history of changes
- Ongoing quarterly consultation hours with Point-of-Care Partners regulatory experts
- Sentinel alerts that provide early notification of emerging regulations, helping you to set the stage with clients and proactively address concerns.

“Point-of-Care Partners keeps the Law Review up to date; we can’t keep up with all the regulations ourselves”

VP Regulatory Affairs, HIT Vendor

The ePrescribing State Law Review Advantage

Cost Effective

Tap into cost-effective regulatory research while reducing staff time researching regulations and implementing hot fixes to meet unexpected regulatory requirements

Expert Access

Gain access to our regulatory experts who are pharmacists and ePrescribing experts for questions and clarifications from state agencies

Timely and Efficient

Gain timely access to regulatory changes and incorporate regulatory changes as part of normal product development

Market and Customer-Centric

Deliver regulatory-compliant solutions and services to your markets and avoid situations that could cause pharmacies to reject prescriptions or put prescribers at risk for noncompliance and/or penalties

Count on the ePrescribing State Law Review for:

1. State-specific requirements for faxed and printed prescriptions
2. Rules governing electronic transmission of prescriptions
3. Prescription authority rules and documentation requirements for mid-level prescribers
4. Controlled substance schedule variances for states that categorize certain drugs differently from the DEA
5. Controlled substance prescribing limitations
6. State requirements for dispensing biosimilar drugs
7. PDMP access and integration laws
